Portfolio Website: rdesiign.github.io

I'm an **Industrial Designer** with a **Master's in Integrated Product Design** from **TU Delft**. I'm passionate about designing consumer products and have **experience in bringing products to market**. My design approach is **flexible** and **responsive**, adapting to the specific challenges of each project. I'm open to new ideas while continuously expanding my skill set.

Experience

Klynk | Industrial Designer | Hyderabad, India

Jan, 2021 - July, 2022

- Designed and developed **Semi, a smart induction cooktop** aimed at supporting novice cooks, taking the product from concept to a fully functional prototype.
- Collaborated closely with a **cross-functional team** of mechanical, embedded systems, and sourcing engineers to refine the design for user testing and manufacturing.
- Led efforts in **Industrial Design**, focusing on intuitive user experience and aesthetics tailored to novice cooks.
- Defined and executed **CMF (Colour, Material, and Finish)** strategies to align with brand identity and production feasibility.
- **Designed the unit for production** and ensured **cost-effective manufacturability**.
- Developed and coordinated **pilot testing plans** to validate product usability and performance.
- Created high-quality **3D visualisations** and renderings for stakeholder presentations and marketing.

Accenture x TU Delft | Thesis Project Mentorship | Delft, The Netherlands.

Feb, 2025 - June, 2025

- Collaborated with TU Delft and Accenture Industry X (formerly VanBerlo) on the Fixophobia research initiative, developing a **conversational AI assistant to make consumer electronics repair accessible to non-experts**.
- Designed a **modular, repairable headphone** system informed by user pain points, **pairing AI-driven guidance** with physical product design to improve repairability and user adoption.

Tata Centre for Technology and Design (TCTD) | Design Intern | Mumbai, India

May - July, 2020

- Created visual documentation for two projects addressing grassroots challenges in India: puncture-proofing tires for rural roads and low-cost jaggery (cane sugar) production.
- **Analysis of the social impact** of projects mentioned above and shared insights to **guide design improvements** and ensure community relevance.

Education

Delft University of Technology | Delft, The Netherlands

Sep, 2023 – July, 2025

MSc Integrated Product Design

Woxsen School of Arts and Design | Hyderabad, India

Aug, 2017 - Aug, 2021

B.Des (Bachelor's in Design) Product Design

Collaborations

Sony Electronics | Design for Repair elective | TU Delft

- Assessed the Sony WH1000XM5 headphones through **disassembly maps and the French Repairability Index (FRI)**.
- Proposed a redesigned concept for **easier repairability**.

Viso X Douwe Egberts | Inclusive Design elective | TU Delft

- **Conducted field studies and user interviews** to evaluate the **inclusivity** of office coffee machines for **visually impaired users**, identifying opportunities for **accessibility and socially focused design improvements**.
- Proposed an **inclusive** design concept for an office coffee machine through **co-creation sessions with visually impaired stakeholders**.

HVC Groep | Advanced Concept design | TU Delft

- Proposed design concepts to support the Netherlands' transition to district heating by 2030, focusing on **novel, sustainable and energy-efficient heating solutions**.

Palmsens | Advanced Embodiment Design | TU Delft

- Research, Design and Development of Design concepts for a programmable biosensor for **laboratory applications**.

Skills

Software

- Solidworks
- Fusion360
- Rhino 3D
- Keyshot
- Blender
- Photoshop
- Illustrator
- Indesign
- Premiere Pro
- Figma

AI Tools

- Botpress
- Vizcom
- Midjourney
- **Research and Analysis**
Problem identification and analysis through interviews and **field studies**
- **Conceptualisation**
Multimedia explorations (**analogue and digital sketching, cardboard and foam mockups, 3D modelling, 3D printing**)

- **Visualisation**

Product storytelling through **storyboards and videos**, **Digital visualisations** and **physical product compositions** to understand product context and use.

Languages

- English (Fluent)
- Hindi (Intermediate)
- Dutch (Beginner)
