[rdesiign.github.io](https://github.com/rdesiign)

I am an Industrial Designer (**MSc, Integrated Product Design, TU Delft**) specialising in **consumer products and user experiences (UX)**. With **experience in taking ideas from concept to market**, I blend user insight, design strategy, and hands-on development to create products that are both useful and engaging.

### Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                       |
